---

1. Blasting shall only be performed by a certified blaster.

2. The danger zone (500 meters radius) must be cleared of all personnel and machinery before blasting.

3. Warning sirens must be sounded 5 minutes before the blast, and 1 minute before the blast.

4. Misfires must be handled cautiously. No one shall enter the blast area for at least 30 minutes after a suspected misfire.

5. Explosives must be transported in approved explosive vans.
