Shift Report - Karo OCP

Date: 25 June 2026

Shift: C (22:00 - 06:00)

Personnel:

- Shift Overman: Vikram Das

Safety Observations:

- Major roof fall observed in Panel 4C, 3 workers narrowly escaped.

- Methane sensors are currently non-functional in the main heading.

- Ventilation auxiliary fan F-04 tripped and could not be restarted, leading to air stagnation.

- Explosives were found unattended near the drilling site without a shotfirer present.

- Immediate evacuation ordered.

Corrective Actions:

- Evacuated the section.

- Waiting for safety team to arrive.
